ABOUT ME

I am currently intrigued by all things that have to do with the web development world. As I looked into this field and started learning what it takes to develop apps and the processes that go into it, I found myself wanting to increase my knowledge with each small success. Eager to learn new concepts and methods to increase my skillset. Willing to adapt to meet the accepted criteria for projects and company goals. Enjoy working in team-oriented atmosphere.

TECHNICAL SKILLS

Node.js, Express, JavaScript, jQuery, React.js, GIT, Github, MongoDB, MySQL, HTML, CSS, Bootstrap, Media Queries, APIs, JSON, REST, AJAX, the command line, writing tests.

EXPERIENCE

LOGISTICS COORDINATOR • SHAWSTEWART LUMBER • JAN 2021 – CURRENT

Direct yard staff and drivers to complete deliveries and coordinate daily activities to ensure effective and efficient business practices and goals.

OPERATIONS MANAGER • NORTHWEST RESPIRATORY SERVICES • APR 2014 – JAN 2021

Oversee a fleet of 25 drivers. Duties include managing and giving direction to complete daily tasks. Communicate effectively with all departments to create a positive goal oriented atmosphere.

EDUCATION

CERTIFICATE • DEC 2021 • UNIVERSITY OF MINNESOTA

You might want to include your GPA and a summary of relevant coursework, awards, and honors.

APPLICATIONS BUILT

MoviesApi | Front End Developer | https://jbirkland.github.io/movies_api/

- Movie app that suggests movies by popularity rating.
- Uses mainly JavaScript and also Bootstrap and UIKit to create page design.
- Two API calls formatted to get, return json and place to web page dynamically.

WeatherApi | Lead Developer | https://jbirkland.github.io/weather_connect/

YOUR NAME

|

- Weather app that searches a city and gets a 5-day forecast.
 - Uses JavaScript, API calls, Bootstrap and dynamically updated HTML.
 - Uses json and local storage to save cities searched.
- JavaScriptQuiz | Lead Developer | https://jbirkland.github.io/jsFundaTime_quiz/
- Quiz that stores questions and answers through object arrays. It allows users to answer the questions and then store the answers and there score to show them at the end.
 - Mainly uses event listeners, for loops and set interval through JavaScript.
